

PROFESSIONAL SUMMARY

WordPress developer with 10 years of experience at mission-driven nonprofits, specializing in custom theme development, Advanced Custom Fields (ACF) content modeling, and Pantheon-hosted multisite estates with Git-based CI/CD deployment workflows. Combines PHP / Python engineering depth with accessibility-first design (WCAG 2.1 AA) and Google Analytics 4 (GA4) instrumentation. Adept at translating technical tradeoffs for non-technical colleagues across editorial, marketing, and IT.

EXPERIENCE

Web Development Analyst / Web Designer

Casualty Actuarial Society

11/2021 – 10/2025 · Arlington, VA

- Built custom WordPress themes and ACF-driven content models for a 9-site multisite estate hosted on Pantheon, using DDEV local environments and Git-based CI/CD staging → production deployment workflows.
- Authored, Evaluated and safely updated third-party WordPress plugins across all properties.
- Spearheaded Drupal editorial workflow automation, reducing editorial handling time by 60% per release cycle.
- Designed accessibility-first prototypes across Drupal and WordPress properties: ARIA attributes, keyboard navigation, focus management (WCAG 2.1 AA).
- Served as the technical bridge between editorial, marketing, IT and vendor. explained architectural tradeoffs and scoped timelines for competing requests.
- Implemented Google Analytics Dashboard API in WordPress; authored GA4 reports in Looker Studio.

Independent Web Architect

10/2025 – Present

Upwork — Independent Web Development

Intentional skill-elevation period: Built 10+ fully-operational prototypes across legal, education, healthcare, sports, and e-commerce verticals; developed a SPA-to-Wagtail CMS conversion pipeline; launched active Shopify/Liquid commerce practice. Returning to staff roles with demonstrably broader CMS architecture and deeper PHP capability.

- Developed custom PHP functionality and WordPress plugin integrations for multi-step intake workflows, consent-gated form submissions, and third-party API consumption.
- Architected reusable editorial components (hero sections, card grids, multi-step forms) following block-based content paradigms directly transferable to Gutenberg development.
- Engineered a single-page-application-to-Wagtail CMS conversion pipeline enabling rapid prototype-to-production deployment.

Webmaster

06/2019 – 03/2021 · Washington, D.C.

Special Olympics

- Managed Inclusive Health Center redesign; served as technical liaison to external development agency and proprietary CMS (Brightspot) team.
- Delivered regular analytics reporting via Google Analytics and Python; maintained and published content across properties.

Web Developer / Digital Marketing Specialist

06/2017 – 12/2018 · Washington, D.C.

American Road & Transportation Builders Association (ARTBA)

- Created, designed, and managed 7 WordPress websites leveraging HTML, CSS, and JavaScript; executed 3 site redesigns and 1 microsite from scratch.
- Tracked, analyzed, and reported via Google Analytics and Google Tag Manager; managed MailChimp, Zapier, Eventbrite integrations.

SKILLS

CMS & PHP	WordPress (custom theme development, plugin development, ACF / content modeling, Composer), Drupal (module development), Wagtail/Django, Shopify/Liquid
Frontend	PHP, HTML5, CSS3 (Grid, Flexbox, custom properties), JavaScript (vanilla, async), Twig/Timber, Jinja, Liquid, Nuxt, Vite
DevOps	Git, CI/CD (GitHub Actions), DDEV, Docker Compose, Pantheon.io, staging → production workflows
Analytics	Google Analytics 4, Google Tag Manager, Looker Studio, GA Dashboard API
Accessibility	WCAG 2.1 AA, ARIA, keyboard navigation, focus management, semantic HTML
Architecture	MVC/MVT, editorial workflow design, multi-property publishing estates, content modeling

EDUCATION

B.S. Psychology / Human-Computer Interaction (HCI) — George Mason University, May 2017
Computer Science: 39 credits completed · Formal concentration in Human Factors & Applied Cognition
