

PROFESSIONAL SUMMARY

Senior web architect with 10 years spanning mission-driven nonprofits and independent consulting engagements. Builds custom themes, plugins, Gutenberg blocks, and Elementor components across WordPress and headless stacks — grounded in content modeling (CPT/ACF, Django models, Wagtail StreamField), structured data (JSON-LD, schema.org), and WCAG 2.2 AA. Full-stack: PHP, Python, MySQL, PostgreSQL, Docker, Git CI/CD, GA4/GTM, SEO/AEO, and Core Web Vitals. Translates Figma design systems into production. Serves as technical authority in cross-functional environments — scoping work, managing vendors, and coaching non-technical stakeholders through architectural tradeoffs with clarity.

EXPERIENCE

Web Development Analyst / Web Designer

11/2021 – 10/2025 · Arlington, VA

Casualty Actuarial Society

- Maintained 11 WordPress websites (Gutenberg, Elementor, ACF, Classic Editor) — handling content updates, plugin management, security updates, and weekly email membership communications through a helpdesk ticketing system.
- Designed a reusable microsite template adopted across 5 annual signature events; authored a web component specification document for vendor handoff and internal stakeholder review. Managed the external development vendor through spec, build, QA, and launch — the template remains in production after departure.
- Identified and remediated a remote script execution vulnerability embedding spam on a live page; implemented MFA across the user base and performed manual SQL database password resets (MD5 encryption). Managed Sucuri WAF, malware scanning, and security hardening.
- Coached the editorial team to self-publish their quarterly publication through the WordPress admin, reducing IT helpdesk ticket volume by 60%. Spearheaded Drupal editorial workflow automation, reducing editorial handling time by 60% per release cycle.
- Led the migration of 11 sites from Google Analytics Universal to GA4; built recurring Looker Studio dashboards for stakeholder reporting. Explored the GA4 Dashboard API to create an in-WordPress admin reporting plugin.
- Served as technical bridge between editorial, marketing, IT, and external development vendors — scoping work, evaluating proposals, QA'ing deliverables, and translating architectural tradeoffs for non-technical stakeholders.

Independent Web Architect | 10/2025 – Present

Building end-to-end CMS integrations from cold audits to production launches — see portfolio for project reports, prototypes, and live builds. Each engagement follows a forensic audit → prototype → CMS architecture → turnkey delivery pipeline. Recent work includes a custom Vue.js help desk ticketing plugin, multi-step e-signature intake workflows, and CPT/ACF content architectures across WordPress, Elementor, and headless stacks. Deliverables include forensic site audits, component specification documents, and administrator guides.

Webmaster

06/2019 – 03/2021 · Washington, D.C.

Special Olympics

- Managed Inclusive Health Center redesign; served as technical liaison to external development agency and proprietary CMS (Brightspot) team.
- Delivered regular analytics reporting via Google Analytics and Python; maintained and published content across properties.

Web Developer / Digital Marketing Specialist

06/2017 – 12/2018 · Washington, D.C.

American Road & Transportation Builders Association (ARTBA)

- Created, designed, and managed 7 WordPress websites leveraging HTML, CSS, and JavaScript; executed 3 site redesigns and 1 microsite from scratch.
- Tracked, analyzed, and reported via Google Analytics and Google Tag Manager; managed MailChimp, Zapier, Eventbrite integrations.

SKILLS

CMS & Builders	WordPress (custom themes, plugins, Gutenberg blocks, ACF, Composer), Elementor Pro, Drupal (module development), Wagtail/ Django, Shopify/Liquid
Frontend	PHP, HTML5, CSS3 (Grid, Flexbox, custom properties), JavaScript, Vue/Nuxt, Vite, Twig/Timber, Jinja, Liquid, Figma → production
DevOps & Hosting	Git, CI/CD (GitHub Actions), DDEV, Docker, Pantheon.io, WP Engine, Cloudflare, Sucuri (WAF, malware scanning, hardening)
SEO & Schema	GA4, GTM (event tracking, data layer), Looker Studio, GA Data API, Google Search Console, structured data (JSON-LD, schema.org), SEO/AEO, SEMrush
Performance	Core Web Vitals (LCP, INP, CLS), PageSpeed optimization, CDN/caching, image optimization
Accessibility	WCAG 2.2 AA, ARIA, keyboard navigation, focus management, semantic HTML

EDUCATION

B.S. Psychology / Human-Computer Interaction (HCI) — George Mason University, May 2017
Computer Science: 39 credits completed · Formal concentration in Human Factors & Applied Cognition
